

FlexExecSM Aviation Solutions

Business jet connectivity built to a higher standard

Inflight Connectivity Engineered for Business Aviation

Intelsat's FlexExec is a global, secure, multi-layered broadband satellite connectivity service that delivers consistent, high performance coverage. FlexExec is uniquely designed for business aviation customers as network capacity is not shared with commercial aviation or consumer broadband customers. Business jet passengers will always have a reliable and consistent connectivity experience.

Flexible and Scalable

As the world's first global Ku-band high throughput satellite (HTS) service, FlexExec focuses on high traffic routes with HTS coverage and layers of wide-beam capacity for added resiliency and redundancy. FlexExec enables maximum customer control and choice through nimble, open architecture solutions as well as efficient use of bandwidth which is critical when routes and passenger demand shift unexpectedly.

Additionally, Intelsat remains at the forefront of cybersecurity. It is the only satellite operator certified by an independent auditor for Service Organization Control 3 (SOC 3) compliance. FlexExec gives you the consistency, security and scalability required to meet your business aviation needs now and well into the future.

Offsite Should Never Mean Offline

The power of FlexExec ensures a seamless and reliable passenger experience across every device and application, regardless of how many jets are on the network. Passengers will experience unfettered applications while never worrying about staying connected. No matter what service plan you go with, FlexExec speeds are never throttled. The best passenger experience is achieved every time.

The FlexExec Advantage

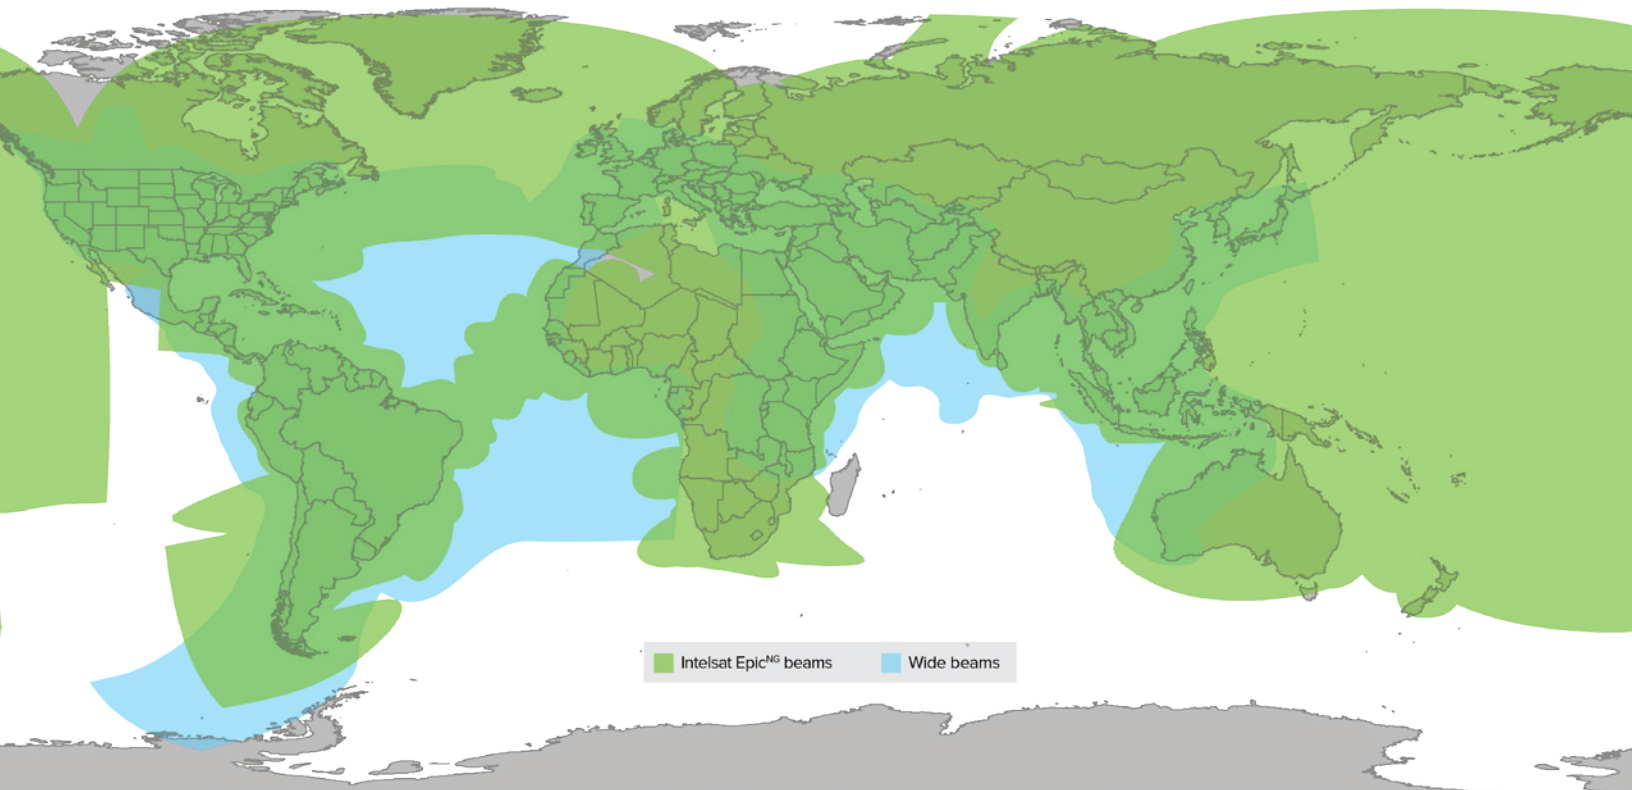

- Strength, breadth and depth of a fully Integrated, open architecture Ku ecosystem
- Global, multi-layered coverage specifically committed to business aviation
- 10/2 Mbps speeds supporting streaming video, cloud-based services, email, voice and text
- Industry-first service plan flexibility tailored to meet customer needs

INTELSAT

Envision. Connect. Transform.

FlexExec Aviation Network

FlexExec is offered through Satcom Direct

FlexExec enables flexible billing plans that work best for Flight Department Operations. To see what FlexExec can do for you, contact Satcom Direct, the master distributor of FlexExec.

About Intelsat

Intelsat operates the world's first Globalized Network, delivering high-quality, cost-effective video and broadband services anywhere in the world. Intelsat's Globalized Network combines the world's largest satellite backbone with terrestrial infrastructure, managed services and an open, interoperable architecture to enable customers to drive revenue and reach through a new generation of network services.

Thousands of organizations serving billions of people worldwide rely on Intelsat to provide ubiquitous broadband connectivity, multi-format video broadcasting, secure satellite communications and seamless mobility services. The end result is an entirely new world, one that allows us to envision the impossible, connect without boundaries and transform the ways in which we live.
